PROFILE

B.A. Information Technology Management Student (2nd year) — Seeking part-time internship AI/IT. I build projects combining Python, REST APIs, databases and LLM integrations, and I use AI tools to prototype, review, test and document — always validating the result. I bring high-traffic customer-facing experience, which gives me judgment for real support and process problems before automating them. Seeking a part-time internship (20 h/week) in AI, automation or IT where I can learn by building.
