PROFILE

Information Technology Management student at UADE (2nd year, GPA 8.2/10). I work with data in my own projects: I collect it from several sources, clean and combine it with Python and Pandas, store it in SQL databases (PostgreSQL, SQLite) and turn it into dashboards and clear summaries. I also built Excel trackers for sales and inventory at my part-time job. I like documenting what I build and explaining results to non-technical people. I want to start my career in data analytics, and the Emerging Talent Fellowship is the kind of program where I can learn BI tools like Looker and Snowflake on real business questions.

PROJECTS

Prode Mundial 2026 — Statistical sports prediction engine | 2026

Python · Pandas · NumPy · External APIs

- Data pipeline that pulls data from 10 external sources (including prediction-market odds), cleans it and combines it into a weighted consensus.
- Probability model (7x7 Poisson matrix) and 10,000 Monte Carlo simulations to estimate results; published on a web page.
- Repo: https://github.com/nachopalmeri/prode-mundial-2026 · Demo: https://prode-mundial-2026-ten-omega.vercel.app

JobBot — Job listing aggregation with LLM summaries | 2026

Python · FastAPI · PostgreSQL · Telegram Bot API · LLMs (Groq)

- Collects job listings from multiple sources, removes duplicates, filters them by rules and stores them in PostgreSQL.
- Sends scheduled alerts with LLM-generated summaries; web dashboard with JWT/httpOnly authentication.
- Built with AI assistance and manually reviewed (81+ commits). Repo: https://github.com/nachopalmeri/jobbot

FranquiYA — Operations dashboard prototype for a franchise | 2025 – 2026

Next.js · React · TypeScript · FastAPI · SQLAlchemy · SQLite

- Dashboard for inventory, invoices, employees, shifts and audits, with the data model designed from real store operations.
- REST API with validated models and tests (pytest, Jest). Demo: https://franqui-ya.vercel.app

EXPERIENCE

Customer Service Representative — Grido (franchise) | 2023-10 – Present

- Customer-facing service at a high-traffic point of sale; cash reconciliation and inventory control.
- Built my own Excel trackers to follow sales and inventory over time.
- Current load: ~10 h/week (part-time).

EDUCATION

B.A. in Information Technology Management — UADE | 2025-03 – 2028-12 (expected)

- In progress, Q4, regular student. GPA: 8.2/10. 15 of 40 courses completed.

High School Diploma in Economics & Administration — Colegio Eccleston | 2020-03 – 2024-12-20

- GPA: 9.11/10.

TECHNICAL SKILLS

- Data: SQL, PostgreSQL, SQLite, Python (Pandas, NumPy), data cleaning and merging from multiple sources, advanced Excel
- Visualization & BI: web dashboards (Next.js/React), Excel charts and trackers. Not used yet, eager to learn: Looker, Tableau, Snowflake
- Tools: Git/GitHub, GitHub Actions, Linux (RHEL/Ubuntu, WSL2), Bash, FastAPI

- AI tools: Claude, Groq, Gemini; AI-assisted development with review and testing

CERTIFICATIONS

- Claude Code in Action — Anthropic, 2026.
- Red Hat System Administration I (RH124) — Red Hat Academy, 2025.
- CCNA 1: Introduction to Networks — Cisco Networking Academy / UADE, 2026.

LANGUAGES

- Spanish: native
- English: B1 (intermediate), self-assessed, not formally certified. I read technical documentation in English.

AVAILABILITY

- Based in Buenos Aires, available on-site 3 days a week from March 2027. Evening classes at UADE (Mon–Fri, 18:45).
