PROFILE

Information Technology Management student at UADE (2nd year, evening in-person classes). I build projects with Python, REST APIs, SQL databases and LLM integrations, and I use AI-assisted coding tools to prototype, review, test and document, always validating the result before relying on it. I am looking for a part-time internship (20 h/week) where I can support the development, testing and documentation of APIs and internal applications and learn from an experienced engineering team.
