PROFILE

Second-year student (Q4) of the Bachelor's in Information Technology Management at UADE (Buenos Aires), GPA 8.2/10, expected graduation December 2028. I work with data and AI every day: I build dashboards, pipelines and automations with Python, SQL and LLMs that I develop, test and validate myself. I come from high-volume customer service, which gives me real judgment for turning service and sales data into concrete improvements. I'm looking for a morning-shift internship where I can combine customer service experience with data analysis and process automation.

EDUCATION

Bachelor's in Information Technology Management — UADE (Buenos Aires) | Mar 2025 – Dec 2028 (expected)

- 4th quarter in progress, regular student. GPA: 8.2/10. 15 of 40 subjects approved.

High School Diploma in Economics & Administration — Colegio Eccleston | Graduated Dec 2024

- GPA: 9.11/10 (official transcript).

EXPERIENCE

Customer Service Representative — Grido (franchise) | Oct 2023 – Present

- Customer service at a high-traffic point of sale: handling inquiries, resolving issues in real time and invoicing.
- Cash reconciliation, inventory control and shift coverage.
- Built my own Excel spreadsheets to track sales and inventory (formulas, pivot tables, data cross-checking).
- Current workload: ~10 h/week (part-time).

PROJECTS (DATA, DASHBOARDS & AUTOMATION)

JobBot — AI-powered job search assistant (bot + dashboard) | 2026

Python · Telegram Bot API · FastAPI · Next.js · PostgreSQL · LLMs (Groq)

- Bot that aggregates offers from multiple sources, filters results and sends alerts with LLM-generated summaries.
- Process automation and dashboards with JWT authentication. https://github.com/nachopalmeri/jobbot

FranquiYA — Full-stack dashboard for franchise operations | 2025 – 2026

Next.js · React · TypeScript · FastAPI · SQLAlchemy · SQLite

- Prototype (57 commits) with operational dashboards: inventory, invoices, employees, shifts, audits and tasks.
- Business flows designed on real operations; models validated with Pydantic and testing. https://github.com/nachopalmeri/FranquiYA

World Cup 2026 Pool — Statistical prediction engine | 2026

Python · NumPy/Pandas · External APIs · MIT

- Automated data pipeline: consensus of 10 sources, 7×7 Poisson matrix, 10,000 Monte Carlo simulations per group.
- Structured data analysis turned into actionable insights. https://prode-mundial-2026-ten-omega.vercel.app

TECHNICAL SKILLS

- Data & reporting: Advanced Excel (formulas, pivot tables, data cross-checks — spreadsheets of my own in daily use), SQL, PostgreSQL, SQLite, Python (pandas, NumPy), dashboards with Next.js/React
- Applied AI: LLMs (Claude, Groq, Gemini), prompt engineering, agents and automation flows
- Languages & frameworks: Python, JavaScript, TypeScript, FastAPI, Next.js, React
- Infrastructure: Linux (RHEL/Ubuntu, WSL2), Git/GitHub, GitHub Actions, Vercel, Bash
- Service & business: Customer service, complaint management, process improvement, documentation of procedures, agile methodologies

CERTIFICATIONS

- Claude Code in Action — Anthropic, 2026.
- Red Hat System Administration I (RH124) — Red Hat Academy, 2025.
- CCNA 1: Introduction to Networks (Cisco track) — UADE, in progress, expected completion Dec 2026.

LANGUAGES

- Spanish: native
- English: B1 (intermediate), self-assessed, not formally certified. I read technical documentation in English.

AVAILABILITY

- Part-time: 20 h/week (4 h/day, Monday to Friday, morning shift — as required by the posting).
- On-site San Fernando (AMBA) or hybrid. Immediate start.
