PROFILE

Second-year (Q4) student of the B.A. in Information Technology Management at UADE (in-person evening classes, Mon–Fri), GPA 8.2/10, expected graduation December 2028. I work daily with data and AI: I build my own pipelines, dashboards and automations with Python, SQL and LLMs that I develop, test and validate myself. I also bring customer-facing operations experience (high-traffic point of sale), which gives me judgment for real support and process problems before automating them. Seeking an SAP iXp internship (starting October 2026) in software & support where I can learn by doing.

EDUCATION

B.A. in Information Technology Management — UADE | Mar 2025 – Expected Dec 2028

- Fourth semester (Q4) in progress, good academic standing. GPA: 8.2/10.
- 15 of 40 courses completed.

High School Diploma in Economics & Administration — Colegio Eccleston | Graduated Dec 20, 2024

- GPA: 9.11/10 (official transcript).

EXPERIENCE

Customer Service Representative — Grido (franchise) | Oct 2023 – Present

- Customer-facing service at a high-traffic point of sale: handling inquiries, resolving issues in real time, billing.
- Cash reconciliation, inventory control and shift coverage; built my own Excel trackers for sales and inventory follow-up.
- Current load: ~10 h/week (part-time).

PROJECTS

JobBot — AI-assisted job search (Telegram bot + dashboard) | 2026

Python · Telegram Bot API · FastAPI · Next.js · PostgreSQL · LLMs (Groq)

- Telegram bot that aggregates job postings from multiple sources, filters results and sends scheduled alerts with LLM-generated summaries.
- Web dashboard with auth (JWT, httpOnly cookies) and billing layer in sandbox mode. https://github.com/nachopalmeri/jobbot

FranquiYA — Full-stack dashboard prototype for franchise operations | 2025 – 2026

Next.js · React · TypeScript · FastAPI · SQLAlchemy · SQLite

- Prototype dashboard (57 commits) for internal operations: inventory, invoices, employees, shifts, audits and tasks.
- REST API backend, Pydantic-validated models and testing (Jest/pytest). https://github.com/nachopalmeri/FranquiYA

World Cup 2026 Predictor — Statistical sports prediction engine | 2026

Python · NumPy/Pandas · external APIs (odds) · MIT

- Weighted consensus of 10 sources, 7×7 Poisson matrix, 10,000 Monte Carlo simulations per group; automated data pipeline. https://prode-mundial-2026-ten-omega.vercel.app

TECHNICAL SKILLS

- Data & analysis: Advanced Excel (formulas, pivot tables, data cross-checks), SQL, PostgreSQL, SQLite, Python (pandas, NumPy), dashboards with Next.js/React
- Applied AI: LLM integration (Claude, Groq, Gemini), prompt engineering, agent workflows, AI-assisted documentation and process automation
- Languages & frameworks: Python, JavaScript, TypeScript, FastAPI, Next.js, React
- Infrastructure & tools: Linux (RHEL/Ubuntu, WSL2), Git/GitHub, GitHub Actions, Vercel, Railway, Bash

- Business & administration: Process modeling, customer service, documentation of procedures, agile methodologies

CERTIFICATIONS

- Red Hat System Administration I (RH124) — Red Hat Academy, 2025.
- Claude Code in Action — Anthropic, 2026.
- CCNA 1: Introduction to Networks (Cisco track) — UADE, in progress, expected completion Dec 2026.

LANGUAGES

- Spanish: native
- English: B1 (intermediate), self-assessed, not formally certified. I read technical documentation in English.

AVAILABILITY

- Part-time: 20 h/week (ideal). Morning or afternoon shift, Mon–Fri.
- Hybrid or on-site Buenos Aires. Available from October 2026; immediate start if required.
