PROFILE

Information Technology Management student at UADE (2nd year, evening in-person classes). I build backend systems in Python: REST APIs with FastAPI and Pydantic, relational persistence with SQLAlchemy over PostgreSQL and SQLite, automated tests with pytest, and data pipelines that call external APIs. I use AI tools to prototype and document and always review and test the output. I am looking for a junior backend role in a remote-first team where I can own small pieces of work, keep improving, and learn from experienced engineers.

PROJECTS

FranquiYA — Backend of a franchise operations dashboard (prototype) | 2025 – 2026

Python · FastAPI · SQLAlchemy · SQLite · Pydantic · pytest · Next.js

- 57 commits. REST API with validated models, relational persistence and tests (pytest, Jest).
- Domain modules: inventory, invoices, employees, shifts and audits, designed from real business operations.
- Demo: https://franqui-ya.vercel.app · Repo: https://github.com/nachopalmeri/FranquiYA

JobBot — Job aggregation backend with LLM summaries | 2026

Python · FastAPI · PostgreSQL · Telegram Bot API · LLMs (Groq)

- Aggregates listings from multiple sources, filters and deduplicates them, and sends scheduled alerts with LLM-generated summaries. JWT/httpOnly authentication.
- 81+ commits on GitHub. Built with AI assistance and manually reviewed. Repo: https://github.com/nachopalmeri/jobbot

Prode Mundial 2026 — Statistical prediction engine | 2026

Python · NumPy/Pandas · External APIs

- Data pipeline combining 10 external sources with a 7x7 Poisson model and 10k Monte Carlo simulations. Repo: https://github.com/nachopalmeri/prode-mundial-2026

PISKU — Python CLI for LLM context management | 2026

Python · argparse · LLM APIs

- Modular CLI: parser, dispatcher and context manager.

EXPERIENCE

Customer Service Representative — Grido (franchise) | 2023-10 – Present

- Customer-facing service at a high-traffic point of sale, real-time incident handling, cash reconciliation and inventory control.
- Built own Excel trackers for sales and inventory.
- Current load: ~10 h/week (part-time).

EDUCATION

B.A. in Information Technology Management — UADE | 2025-03 – 2028-12 (expected)

- In progress, Q4, regular student. GPA: 8.2/10. 15 of 40 courses completed.

High School Diploma in Economics & Administration — Colegio Eccleston | 2020-03 – 2024-12-20

- GPA: 9.11/10.

TECHNICAL SKILLS

- Backend: Python (OOP), FastAPI, Pydantic, SQLAlchemy, REST APIs, JWT authentication (I have not used Go or Node.js yet)
- Databases: SQL, PostgreSQL, SQLite
- Testing & tools: pytest, Jest, Git/GitHub (81+ commits in JobBot), GitHub Actions, Linux (RHEL/Ubuntu, WSL2), Bash, Vercel, Railway
- Other: TypeScript, JavaScript, Next.js, React

- AI tools: Claude, Groq, Gemini, prompt engineering, AI-assisted development with review and testing

CERTIFICATIONS

- Claude Code in Action — Anthropic, 2026.
- Red Hat System Administration I (RH124) — Red Hat Academy, 2025.
- CCNA 1: Introduction to Networks — Cisco Networking Academy / UADE, 2026.

LANGUAGES

- Spanish: native
- English: B1 (intermediate), self-assessed, not formally certified. I read technical documentation in English.

AVAILABILITY

- Remote, weekday daytime hours (in-person evening classes at UADE Mon–Fri). Immediate start.
